DUCKS PROTECTED

Sportsmen Petition President to Have Suitable Federal Laws Enacted.

Sportsmen all over the country are longing for the day when the national government will make national laws to protect migratory game birds, and many are in favor of having the government extend its authority over all game and fish. While many Utah sportsmen strongly advocate this action, nothing definite has been done to accomplish these ends. Not seen done to accomplish these ends. Not so with the Spokane sportsmen, the leading hunters of that city having recently adopted a petition and forwarded it to President Roosevelt. The petition reads: "To the President of the United States, Washington, D. C.
"We, the undersigned, being alarmed at the increasing scarcity of all forms of wild ducks in this country, and believing that the cause of said reduction is the robbing of the nests and the disturbance of nesting birds in the breeding grounds.

of nesting birds in the breeding grounds in Alaska, do respectfully petition you to use your great influence to have such laws passed and enforced as shall prevent such a misfortune to all true sportsmen and lovers of nature."

The petition was signed by a number of

sportsmen, who later announced their intention of forming a sportsmen's protect tive association similar to the one in Utah. While many causes are given in this state for the scarcity of game and fish, there has been little complaint on account of the ducks. This is because Utah is a natural breeding ground for ducks and the well regulated duck clubs of the state see that the nests of the ducks are not destroyed in the breeding season. It might not be amiss, however, for the Utah association to draft resolutions on top of those sent from Spokane recommending that national laws for the protection of game and fish be enacted. association similar to the one in Utah.

M'KEAN MAKES DRAW ON FIRST DAY OF PLAY

through with a flat-footed offer for fifty per cent of the receipts. He stipulated that Britt insisted on a \$2,500 side bet and flight at catch weights.

The \$2,500 side bet just suited Hyland and Sammy said there would be no trouble about the money matters. He said that he would rather fight Britt winner take all than any other way and put this matter up to Britt in a telegram. Sammy, however, says the weight must be 133 ring side, as Hyland is a lightweight and will not go out of his class to meet any one.

McClintic also stipulated Weish as referee and says he will not accept any other Frisco referee. Welsh is noted as one of the squarest referees on the coast and should be agreeable to Britt and Cofroth. Should Britt not accept the terms offered in the above telegram it is just possible he will hitch up with Herrera for a match.

Superintendent D. H. Christensen Explains Further Proposed Amendment to State Constitution.

D. H. Christensen, city superintendent of schools, issued the following statement vesterday:

"In my discussion of the proposed amendment to the constitution appears one error which I wish to correct.

"The general state fund has at all times since statehood borne all of the expenses essing and collecting state school Chapter 131 of the laws of 1903, taxes. which imposes expense on certain other tax funds exempted the state school tax. This does not, however, alter my position that in the light of past history future legislatures will decline to disturb the resent adjustment of state taxes, viz: 5 mills for general state purposes, including the appropriatons to the University of Utah and the Agricultural college, 3 mills for district schools, including the primary and grammar departments, and likewise

ligh schools should the an endment carry and the legislature exercise the authority conferred. The state government cannot yield a single dollar from its former allotment of 5 mills, and hence any appropriation now for high schools must diminish the amount available for the 3-mill state school tax. While Salt Lake City and Ogden would get their pro rata share, it would likely not equal the amount they would lose in the general apportionment."
